Empress:
Sunday School, 10:30 a. m.
Public Worship, 11:30 a. m.
Leland, 3:00 p. m.
Social Plates, at 7:30 p. m.
We invite you to worship with us.
Rev. Geo. A. Shields,
Minister.

"Cap" Benson, of Success, who pitched ball for the Empress team a few years ago, met with a serious injury in a ball tournament at Swift Current on Dominion Day. He misjudged a fast-pitched ball, and was knocked unconscious when the ball hit him behind the ear. From his head it bounced back from home plate to first base. He was taken to the hospital and discharged in a few days little the worse for the accident.

If the northland holds any secrets, Jack Hornby knew them, they say. Hornby died in 1927 in a remote section of the Thelon River country, in northern Alberta, while searching for gold. Two young Englishmen—cousins of his—died with him. Now, five years after starvation killed the "mystery prospector" a group of miners are prepared to spend money to find out if Hornby was right—that there is gold in rich quantities in Thelon River. The party will leave Edmonton this summer for the north. Samples of almost pure gold quartz

Town Is Visited With Heavy Local Storms

Hall Damage Was Heavy From Abbey to Cabri

Three heavy showers of the cloudburst brand hit town on Friday, accompanied by some hail-stones which were nearly the size of pigeon eggs. Fortunately the stones were few, and outside of breaking a few panes of glass and a little damage to gardens any damage was of a minor nature. The fall of rain was heavy and the streets were flooded. The rains only covered a part of the district and did not extend far north. Further east, from Abbey to Cabri, hail is stated to have cut down crop in a strip twenty miles long and from three to eight miles wide. The hail lay to a depth of eight inches and crop damage is said to be 100 per cent.

were found beside Hornby's body when it was discovered many months after his death. Nobody knows where the veterans got them. If Hornby was ahead of the prospecting world in finding gold in the Thelon River country, it will be another who profits.

Wallace J. Smith, editor and publisher of the Bassano Mail, was married to Miss Kate James, of Vernon, B.C., late last month.

Joe Howse is reported to have suffered a broken collarbone in the bucking contest at the stampede at Lander.

Heavy Rain Storms Flood Streets of Town

Roads, Collaps and Railway Tracks Are Flooded, Wash-outs Occur

Rain-fall Measures Three Inches

Beginning on Wednesday night, soon after 10 o'clock, this district was visited with the heaviest rains within the memory of early residents. Severe lightning in the east and southwest heralded the approach of two storms, which seemed to meet overhead. Some hail, accompanied the rain, and the water was soon so deep in the streets that it was washing up against the tires of cars standing outside. The hotel basement, C.P.R. depot and tracks, and other low-lying basements were flooded. A large hole was washed in the roadway near the depot, the culvert being unable to take the flood of water, other washouts occurred in the roads around town. Gangs of men were called to work on wash-outs on the C.P.R. tracks, both east and west. At 5 a. m. the official gauge measured 2.62 ins.; but it is doubtful whether this would be the full total as the rain came with great force. The rainfall has been heavy since this measurement and apparently the storm is general.

Six cars which went with the ball team to Seppre, were stranded to 4 a. m. on the south side of the ferry. Rains and water washing over the apron of the sewer, and it had become water-logged and had to be baled out in a respite between rains in early morning before it could make the crossing. Bill Pullin who had made the trip across with his car, got stranded in a small wash-out coming to town. Norman Chell walked to town to get his car and then his car got stalled in some washed-up soil and the two cars had to be left and the occupants walked back to town.

Hail Strikes Crops In Social Plains and Leland Districts

Hail accompanying the storm of Wednesday night, is said to have cut through a strip of crop from H. Swenson's to J. Nung's, with damage estimated at thirty to a hundred per cent. Some of those who are reported as suffering damage are, H. Swenson, A. McDonald, W. Barnes, C. Staples, C. Larson, O. Ostrom, W. Hulsebosch, D. McElroy and J. Mays.

Illustration Station Field Meeting

An illustration station field meeting is to be held on the farm of John Barnes, Wednesday, July 20th, at three in the afternoon. Speakers are, A. E. Palmer, Field Husbandry, C. A. Weir, Seed Branch, R. E. Everest, Station Supervisor.

Poultry Conditioners

At certain seasons of the year, particularly in the fall and winter, a great many poultry conditioners are upon the market for which quite often extravagant claims are made. It is not uncommon to find even the better class of these condiment feeds advertised as doubling egg production, a claim which, of course, is absurd. Since a large amount of money is spent annually in stimulants of this type, it seemed to be highly desirable to determine the actual value of these substances. With this object in view an experiment was conducted at the Poultry Division of the Central Experimental Farm.

The conditioner used was considered to be one of the better type and, judged by its ingredients, to have been more or less scientifically compounded. Upon analysis, the ingredients were found to be as stated, with the exception that two ingredients making up 70 per cent of the total were not even mentioned, one of which contained the same stimulant as an ingredient definitely stated in the advertising matter not

Visitors To Lander

W. Acton, J. Usher, Jr., Miss Holly Clark and Miss Grace Clott, were visitors to Lander, Sask., on Monday. They played some friendly games of tennis with members of the Lander Club, and speak highly of the hospitality accorded them.

to be present in the mixture. This condiment was fed exactly according to the manufacturers' directions to two pens of birds, one upon a whole grain, skim-milk ration, and the other upon our standard basal ration. An other pen acted as control and received the standard basal ration but without the condiment feed. Mortality was quite high in all the pens but somewhat higher in the condiment fed pens. Production was slightly higher in the condiment fed pens but not significantly so. On the other hand the control pens had a greater body weight to maintain from the start, and in spite of this showed a gain in body weight as against a similar loss in each of the condiment pens. The efficiency of

St. Mary's Virgin (Anglican Church)

Eight Sunday after Trinity, 10 a. m. Sunday School, 11 a. m., Matins and Sermon, 3 p. m., Covenish School, Evensong and Sermon, 7 p. m., at Mr. John Rowles, Evensong and Sermon.

Rev. J. P. Horns.

use of feed was practically the same for all pens. The net result of this test was that it appeared that there was no justification for using this product to increase egg production since feed consumption, efficiency of use of feed and egg production were not increased.

It must be borne in mind that the condiment used was one of the best on the market, consequently it might be expected that poorer results would be obtained from the use of such conditioners. The sale of these feeds is very large and it can be readily appreciated that such hard-earned money goes to the purchase of such products with apparently no return whatever in increased efficiency of the (cont. on back page)

THE EMPRESS EXPRESS

FORTY-FIVE YEARS OF PROGRESS

A forgotten artist, too modest to sign his name, and a second-hand dealer form the strange combination that brought to light one of the best examples of the growth of Canada's trade with the Orient forty-five years ago. The first ship ever to fly the house-flag of the Canadian Pacific, a day that has since found its way into practically every port in the world, set out from Port Moody, B.C. She was the unique-tug steamer "Abyssinia" and such a marvel was she that the modest artist referred to transferred her graceful shape to canvas with painstaking detail. Another artist, chancing upon the picture, imposed it upon a photograph of the latest Canadian Pacific ship in the Orient trade, the magnificent Empress of Japan. They are shown above in exact proportion as

they would have appeared passing each other on the broad wastes of the Pacific. Some idea of the development of shipping in the 45 years may be gained by a comparison. The "Abyssinia" was 363 feet six inches long, 42 1/2 feet wide, had a tonnage of 3,378 and a speed of 15 knots. The Empress of Japan is 670 feet long, 87 1/2 feet wide, has a tonnage of 26,000 and, during her record-breaking passages between Vancouver, Victoria, Yokohama, Shanghai, Hong Kong and Manila has developed as high as 23 knots—more than half as fast again. W. A strange coincidence is that the "Abyssinia" was chartered from W. E. Pearce, who later became the Fairfield Shipbuilding Company which famous Clyde-side shipyard built the Empress of Japan two years ago.

The 40th Anniversary of

"SALADA" TEA

Finest quality for 40 years has built the largest sales in North America.

The Imperial Economic Conference

The Imperial Economic Conference, shortly to be convened at Ottawa, is unquestionably one of the most important gatherings ever called in the history of the British Empire. In fact it may easily prove to be one of the most important in the economic history of the whole world, because, whatever decisions it may reach will affect not only the British Commonwealth of Nations, but all nations.

There will be assembled together all the leading governing statesmen of the Empire, supported by the strongest possible groups of financial, economic, commercial and other experts that the Old Country and each of the Dominions can gather together. For months past these statesmen and experts, assisted by small armies of lesser experts and advisers, have been compiling and studying trade and monetary statistics, weighing the effect of this and that, probing as never before into the productive capacities, primary and industrial, of their countries, the natural resources, the state of employment, the requirements of a respective people, the probable and possible trend of future developments and the extent thereof, and the effect of existing policies and possible future policies upon all these matters which enter into the Empire's growth, prosperity and strength.

And the object of it all is to evolve, in the most judiciously acceptable to all parts of the Empire, and which will prove of mutual advantage to all, and having as their objective the encouragement and development of a larger volume of inter-Empire trade. This means that the possibilities and the requirements of each part of the Empire must be ascertained, must be appreciated by all the other parts, and the whole dove-tailed together to the advantage not only of each component part, but of the whole.

It becomes at once self-evident, therefore, that one of the major tasks confronting the Conference will be to find ways and means of removing existing barriers to the free exchange of commodities between one part of the Empire and other parts, to the mutual advantage of both, and without, in the process, working injury to any part. While the Old Country, Canada, and the representatives of each of the Dominions must, of necessity, give particular heed to the interests of their respective nations, it is an essential to the success of the Conference that this be done in no narrow, selfish spirit, but in such a manner that their own country they likewise confer benefits on the sister nations.

This does not mean that the spirit of approach to the intricate problems calling for solution must be one of making concessions, rather it must be that of striving for mutual advantages. In fact the word "sacrifice" should be entirely absent from the Conference, while the term "mutual advantage" should be very much to the fore. In a word, the dominating ideal should not be that expressed in the slogan "British First," "Canada First," "Australia First," but, on the contrary, it should be an adaptation of the motto of the Three Musketeers, "All for One, and One for All."

Along with the removal of existing barriers, and a mutual understanding or agreement that no new barriers will be erected, there must naturally develop policies designed to make ever easier the flow of trade into and out of all parts of the Empire to all other parts. This may involve the ultimate creation of a new system or method of monetary exchange, even an Empire currency. It would seem to be essential that some system be developed whereby the currency of any one part of the Empire should always be on a par with the currency of all other parts; in a word, that the same monetary standard should apply at all times throughout the Empire, and that, for example, at no time should the Canadian dollar be at a discount with the British pound, or vice versa. The guarantee of such a standard would undoubtedly be of tremendous assistance in establishing and maintaining inter-Empire trade at a maximum, removing, as it would, much of the uncertainty and loss which now prevails.

If the forthcoming Conference can achieve a measure of success along these and other lines having the same general object in view, the intended effect upon all parts of the British Empire will be almost incalculable. Not only so, but no other trading nations could afford to ignore such a development. The breaking down of trade barriers in the Empire would quickly become the breaking down of trade barriers by all other nations. It would be the beginning of a reversal of the suicidal policy into which the world has drifted and which has resulted in an almost complete paralysis, or destruction, of international trade and commerce, and in the present state of world depression, unemployment, suffering and hardship.

Canadians may well be proud if, from their national capital, there is evolved a new economic policy for the Empire and the world. That this should emerge from the Conference should be, and we believe is, the fervent desire and hope of the Canadian people irrespective of any minor political differences of adherence to special schools of economic or fiscal thought.

Only Three In Existence

Silk-Cotton Tree Attraction For Tourists At Nassau
Among the many attractions for American tourists at Nassau, in the Bahamas Islands, is the famous silk-cotton tree, which rises several feet like a pyramid, then, at the top, branches off in clumsy shoots. The trunk of the tree is covered all around into ribbon-like formation. There are believed to be only three silk-cotton trees in existence.

There are two kinds of people: Those who are kindly by nature, and those who speed up when some body toots to pass.

The man who says the right thing at the right time is rare. But not half so rare as the man who says nothing at the right time.

Pains In Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Landry, Montreal, N.B., writes: "I can truly recommend Dr. Fowler's Extract. My husband has been suffering from cramps or pains in the stomach and bowels. 'Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I took Dr. Fowler's and was soon relieved.' 'When my children were small I always kept a bottle of Fowler's and it helped them wonderfully whenever any of them had bowel complaints.'"

Island Prison For Doukhobors

D'Arcy Island, Near Victoria, B.C. To Become Place Of Banishment
D'Arcy Island, about 20 miles from Victoria in Haro Straits, will become the home of some 300 Doukhobor men, sentenced to serve three years each for mutiny during the war.

Announcement of the creation of the island prison settlement was made by Oscar Ross, deputy attorney-general, on receipt of an announcement from Ottawa of the decision. The Dominion government will almost immediately commence erection of substantial buildings and other accommodations as may be required.

The Doukhobors will be provided with agricultural implements so that they will be able to raise food-stuffs for their own maintenance. D'Arcy Island was the site of a leper colony many years ago, but it has been closely inspected by medical officials, and has been given a clean bill of health.

It is understood that the Doukhobor women arrested, also numbering some 300, will be placed in a new institution in eastern Canada. A total of 594 adults have been arrested. Three hundred and fifty-nine children will be cared for in various British Columbia institutions. This total of 953 persons, men, women and children, are affected by the action of the Dominion and British Columbia governments in their efforts to place in effect a state of unrest for the interior of the province in which the Sons of Freedom sect of Doukhobors have lived. The countryside has been a state of unrest for years, with nude parades, burning and bombings and consequent menace to life and property.

Remarkable Success Of English Surgeon

Girl Walks After Spine Built Up By Foot Bone
As the result of a remarkable operation performed by Dr. J. B. Lister, a girl, who for eight years was crippled, has returned home cured.

She is Miss Jessie Exton, 17-year-old daughter of Mr. and Mrs. William Exton of Duke Place, Wexford. Up to the age of nine Miss Exton was a lively child, but she became lame, and, finally, a tubercular disease, and for three years she was a patient at the Mansfield sanatorium.

On her return home, a fall after she had returned home aggravated the disease, and she was again unable to walk.

The case was brought to the notice of the Duchess of Portland, and Miss Exton was removed to the Duchess's sanatorium at Bath. Dr. Lister, of Nottinghamshire, where the operation was performed by Mr. Malkin, the senior surgeon, who used a piece of bone from the left foot to build up the spine.

Miss Exton is now able to walk normally. She has since visited Harlow Wood to show the success of the operation to 80 doctors from all parts of Europe.

Arctic Expedition

S.S. Ungava To Carry Mail To Mounted Police Posts
This year's expedition to the eastern Arctic, Baffin Island and Hudson Bay will be undertaken in the S.S. Ungava, which will sail from Montreal in July. The vessel will carry mail to Mounted Police posts and missionary stations, and will convey relief of personnel, stores, etc. All points in the eastern Arctic, to as far north as Buche Peninsula, the most northerly point and customs port in the world, will be visited in the course of the Ungava's voyage.

Slightly Mixed

The president of a certain university was speaking on "Faith," and in declaratory term, told his auditors: "You have blind faith in the physician. He gives you medicine. He tells you to take it. You're not to reason why; you're to do it!" Almost equal to this is the story of the minister, who solemnly assured a congregation that "Many persons have one eye on heaven, while with the other they are listening to the gossip of the earth!"

Seasoned Allev

Dr. A. Gauducheau, of Paris, makes use of a principle of physiology and injects saunas and seasoning directly into the blood stream of chickens. He says this aids the blood, penetrating the meat and none is necessary on cooking the fowl.

A German scientist states that loss of 40 to 50 hairs from the head in a day is the "normal" limit.

Automobiles are owned on 58 per cent of the farms in the United States.

Death Of Pioneer

Col Herbert Swinford, Veteran Of Red River Rebellion, Dies In Winnipeg

Col. Herbert Swinford, veteran of the Red River Rebellion of 1870, and of the North-West Rebellion 15 years later, died recently in Winnipeg at the age of 83.

Born at London, England, he came to Canada with his parents as a boy and jumped into uniform with the Wellington Rifles at Guelph. Ont., when Lord Wolsey was forming his expedition.

Following service, Col. Swinford operated steamboats on the Red and Assiniboine Rivers here. Later he was appointed general agent for the Northern Pacific Railway in Winnipeg. For several years he occupied the same position at Vancouver and returned to Winnipeg only six months ago.

Study Polar Phenomena

Saskatoon Professor To Be Member Of Party To Be Located At Chesterfield Inlet

In the third study of polar phenomena to be conducted in 1932 and 1933, in which over 100 meteorological stations will take part, Saskatoon will have a special interest in the party of four to be located for a year at Chesterfield Inlet in the north-western corner of Hudson Bay.

Dr. Balfour Currie, professor of physics of the University of Saskatchewan, will be a member of the party, which is under the direction of Frank Davies, at one time an instructor in physics at the University of Saskatchewan. Mr. Davies was a member of the Byrd Antarctic Expedition and spent a year making weather observations there. He is well known in Saskatoon and was married here last summer.

No Fool-Proof Rule

Mushroom Hunter Must Depend On His Own Judgment

The public's desire for a fool-proof rule by which to select the edible mushroom from a poisonous one is doomed to unfulfillment. Dr. Fred Seaver, curator of the New York Botanical Gardens, said in a lecture at New York.

"There is no such rule," he stated, "one must learn to know the mushrooms and to distinguish them as you would your friends from your enemies."

Dr. Seaver said that to the mycologist, or student of fungi, there was no significance in terms "toadstool" and "mushroom."

"A mushroom is an edible toadstool or a toadstool is a poisonous mushroom, whichever way one may wish to put it."

Waited Many Years

Woman Graduated Over Half Century Ago Just Received Diploma
An 86-year-old woman, who waited 61 years for her diploma, received it at Bates College commencement.

The woman was Mrs. Sibyl Chase Ballard, of Minneapolis, Minn., who completed her course at Bates in 1869. She was 25 when she received her degree because the college did not then confer on women. Bates now is a co-educational institution.

Stop the Cough.—Coughing is caused by irritation in the respiratory passages and the quickest and most effective way to stop it is by the use of treatment with Dr. Thomas' Electric Oil will allay the inflammation and in consequence the cough will usually stop. Try it and you will be cured.

Bully Taken In

A man was persuaded by a dealer to give several pounds for a jacket, which, he was assured, was of great value. The collector showed his prize to a connoisseur friend, who examined it thoughtfully.

"How much did he rook you for it?" "Seven guineas."

"Well, well! And he didn't throw in the marmalade!"

Teething

"Baby's Own Tablets take away that teething fever," writes Mr. Alfred Hunsan, North Sydney, N.S. "I have also in relieving colds, fever, colic, upset stomach, indigestion, wind, and colic. Children like them. Absolutely SAFE. See analysis of 'normal' tablets. 25c package. 211 Dr. Williams' BABY'S OWN TABLETS

Earth Upheaval

Contour Of Island In Bering Sea Is Changed

An isolated Bering sea island, populated only by a herd of reindeer, seals and great flocks of birds, Bering, has given Father Bernard R. a hand in the decision to prove of how volcanic islands grow.

A great steaming mound of lava, he said in a message sent to Steward, has been pushed out from the earth and has changed the contour of one section of the island completely. The "growth" is apparently increasing in area.

The "growth" is taking place, the Santa Clara University professor messaged, at a place where formerly a sheltered harbor existed.

His observations were made on a voyage from Bristol Bay with his party on the motorship "Polar Bear." Despite storms and high seas, successful landing was made.

40th Anniversary Of Saada Tea Company

Forty years ago this month in an old little building on the corner of Street in Toronto, the Saada Tea Company packed its first product of the year 1892 by the late Honorable Peter Larkin, the husband of the late Mrs. Larkin, and by 1896 a branch had been opened in the city of Toronto.

The Canadian market was invaded and an office opened in Buffalo. To-day, the company is the largest and best known in the world, devoted exclusively to the raising of tea.

The Canadian market was then the largest sale being China tea of poor quality. These teas were being sold from China, exposed to air, dust, dampness, foreign odors, and all detrimental to the quality of the tea.

In England, which was then and still is the greatest tea-drinking country in the world, the quality of tea was poor. It occurred to Larkin that Canadians who would prefer their tea to be of the highest quality should be able to get it in metal packages, in order that the finest quality tea should be kept in its natural state.

The tea was then imported from the largest sale being China tea of poor quality. These teas were being sold from China, exposed to air, dust, dampness, foreign odors, and all detrimental to the quality of the tea.

Reduced Freight Rates

Lower Rates For Livestock In Quantities Less Than Full Carload
Reduced freight rates for the movement of livestock in quantities less than full carloads are being introduced by the railways, according to an announcement made by the Canadian Freight Association. Hereafter a livestock shipper has been required to ship or pay for 20,000 lbs. in the case of cattle, and 10,000 lbs. in the case of hogs and sheep in order to ship under the carload rates.

The new schedule will provide for additional rates subject to minimum weight of 12,000 lbs. and 6,000 lbs. in the case of cattle, and 11,000 lbs. and 6,000 lbs. in the case of hogs and sheep. The rates for the smaller carloads are somewhat higher than for the full cars, but they will give the shipper, who has not sufficient stock to make up a full car, an opportunity of getting the smaller quantities to the markets by rail.

The new rates will apply to market centres from points in the prairie provinces within a radius of 200 miles.

It will be permissible for cars to be stopped at one intermediate point in transit for completion of load at a charge of \$2.00 per car. In making the announcement, the Canadian Freight Association stated that the new rates are in the nature of an experiment for one year.

Passengers Mostly Men

Family Ties To Europe Are Off For Most

When a liner from the United States docked at Liverpool the other day there were 1,068 passengers, and of these 800 were men. The rest of the boat that nearly all were men. One of the male passengers offered an explanation, stating that most of the men were just taking a week or ten days in Europe for a little holiday, and some of them were looking after a little business in the same way. It was necessary to leave the women at home and family ties to Europe were off for the present.

Buy Locally
Keep in mind the fact that when you are in the habit of sending it pays to give the business to your local merchant. If your purchase should for any reason prove unsatisfactory you know just who to find him to get the mistake rectified. The door-to-door salesman is here today and gone tomorrow, and has no stake in the municipality. Why patronize him.

Buyer For Knowledge
An increase of 30,000 readers in Toronto Public Library, presumably due to unemployment, is a sufficient answer to the frequent query, what would workmen do with their spare time? The answer is, they would have shorter hours of work would give them. The workman is just as eager for knowledge as the millionaire.

Unless worms be expelled from the human stomach, the best of Mother Garg's Worm Exterminator will do no good. It is the best of the excellent medicine to destroy worms.

The pygmy owl of the Rocky Mountains region is not much larger than an English sparrow.

Shin has a new tax on salaries.

It never fails to arrive on time. Whatever its destination, it gets to the top.

Whether in a lawn or a hayfield it rears its head above all surrounding vegetation.

It does not submit to circumstance. It extricates them.

It refuses to accept defeat. It cut down it rises again.

It thrives on difficulties.

It is a moral proof that "yellow" is not the color for a quitter.

U.S. War Veterans Leave Nation's Capital After Defeat Of Bonus

Washington.—Discouraged war veterans who came to Washington in hope of receiving cash for their service certificates struggled homeward as their leaders vainly strove to hold their ranks intact.

The United States senate's overwhelming defeat of the bonus payment measure by a vote of 62 to 18 took its toll of the ranks, and roads leading away from Washington were dotted with groups of veterans leaving the nation's capital behind them.

As the result of the vote was announced outside, hoos from the vast throng of veterans mingled with cheers at a statement from one of their leaders that "we will stay here until the bonus is paid."

Hundreds of veterans—clad either in overalls or ragged clothing—sat in the senate galleries waiting for every move as the debate dragged through the day and into the night.

Shortly before the roll call, the thousands of bedraggled former service men at the capital were reinforced by other thousands from the main concentration encampment at Anacostia. They confined their activities, however, to singing war songs and occasionally breaking out with shouts of "We want the bonus."

Farm Mortgages

Loan Companies in Alberta Will Not Foreclose Under Agreement
Ponoka, Alberta.—Mortgage companies will not foreclose on any farm mortgages for one year without approval of the Alberta Debt Adjustment Board, and no foreclosures will be made while interest payments are being maintained.

This assurance was given the Ponoka Constituency Association of the United Farmers of Canada by J. E. Brownlee in addressing the annual constitutional convention. Premier Brownlee said the guarantee of the mortgage companies had been obtained.

Besides the promises not to foreclose, arrangements to make payments in grain were being reached.

Receives Heavy Sentence

Gaston B. Means Convicted On Swindling Charge
Washington.—Gaston B. Means was sentenced to 15 years' imprisonment for swindling Mrs. Evelyn Means, a widow, of \$104,000 in an alleged plan to learn the kidnapped Lindbergh baby.

Justice James M. Proctor in the District of Columbia Supreme Court sentenced the former justice department investigator to 10 years in a January of \$100,000 ransom and five years for larceny of the \$4,000 expense money. The latter sentence is to begin after the 10-year sentence has been fulfilled.

Was Decorated By Queen
Strathmore, Alberta.—Mrs. Robert Barr, who was decorated by Queen Victoria for distinguished nursing service during the Boer War, is dead here in her 75th year. She had been ill for several weeks. Surviving are two sons and a daughter in Africa.

Receives Honorary Degree
Glasgow, Scotland.—Miss Helen Keller, the famous blind and deaf educationist, received the honorary degree of doctor of laws from Glasgow University in the presence of a huge audience.

Imperial Conference At Ottawa Expected To Be Rather Brief

London, England.—The British government and the governments of the Dominions share the belief that proceedings of the Imperial Economic Conference at Ottawa must not be long drawn out, said J. H. Thomas, Secretary of State for the Dominions, in a statement on the conference in the House of Commons.

"No possible preparatory work has been left undone on this side," the minister said, and if the other had acted likewise the conference would not fall in its task of securing greater and freer empire trade.

Tariffs and Imperial preference, the nationalization of industries,

Hoover Re-Nominated

Carries Republican Convention In First Ballot

Chicago.—President Herbert Hoover was re-nominated almost without opposition by the Republican National Convention.

In a first ballot walkway endorsement which rallied to his standard all but a handful of states, Hoover received from the party convalescent re-affirmation of the great leader ship voted him four years ago at Kansas City.

A long, noisy and colorful demonstration had greeted the presentation of his name to the convention, with his home state of California leading the parade.

The re-nomination had been forecast months ago, and it only remained for the assembled delegates to vote to their ratification of the stamp of unmistakable emphasis. This they did with trimmings.

British Immigration

Question Has Not Yet Come Up For Discussion At Inter-Provincial Conference

Edmonton, Alberta.—Commenting on Senator A. D. McLean's suggestion as reported from Winnipeg, to the effect that the question of British immigration to western Canada be considered at the forthcoming inter-provincial conference in Regina, Premier Brownlee says that he has not had a communication from any source in regard to the matter and he presumes that if the Dominion government were proposing to put it on the programme for the imperial economic conference advice to the provincial governments would have been given accordingly.

If occasion arises, however, the Alberta Government will be prepared to express its views on such immigration, says Mr. Brownlee.

Bloodless Sea Fight

British Run Runner and U.S. Cutter In Engagement

Halifax.—Tales of an old-fashioned sea scrap, in which the crews of a British run-runner and United States cutter battered each other with potatoes, turnips, paint pots and molasses jugs about 70 miles off New York, were told here after the military ships "Ganef" and "Mary F. Ruth" limped into harbour.

Masters of both vessels claimed they had been rained by the cutter "Daphne," the "Mary F. Ruth" on Friday, and the "Ganef" on Sunday. The "Ganef" had a large hole in its stern.

Arms Conference Has Suspended Activities

Discussions On Disarmament Postponed For An Indefinite Period

Geneva, Switzerland.—Disarmament has been temporarily sidetracked and war debts and reparations discussions came to the fore, almost on the eve of the League financial conference.

The World Disarmament Conference suspended formal activities for an indefinite period pending private conversations among political leaders looking toward some solution of the disarmament problem.

The United Kingdom government, he declared, "will advocate the establishment of machinery representing the dominions that will keep them in daily contact."

Reconciliation of the divergent interests of the different sections of the empire was a great task, said the minister, and a worthy one, which the great mass of people were hoping would be accomplished. Mr. Thomas said, "It is not an example that will be to the world."

Kiwans International

Delegates From All Parts Of Canada Attending Convention At Detroit
Detroit.—Canadians from all parts of the Dominion arriving here at the 15th annual convention of Kiwans International are prepared for four days of problems pertaining to unemployment aid, urban-rural relations, child welfare, adult education, and civic betterment.

Kiwans was founded in Detroit on January 21, 1915, and the thousands of Kiwanians from all parts of Canada and of the U.S. coming into the city consider the occasion a pilgrimage back to the birthplace of the service organization. "We are justified in our faith in the future of Kiwans," declared William O. Harris, of Los Angeles, International president, in his annual message. "We can be proud of our past accomplishments, and our present opportunity lies in the willingness to serve in the social and economic problems that we face today."

The Canadian delegations are in charge of three district conventions: Charles A. Whyte, of Halifax, N.S., Ontario-Quebec-Montreal district; James P. Fowler, of Swift Current, Sask., Western Canada district; and William B. Harley, of Seattle, Pacific Northwest district.

Two international officers, Andrew G. Gaul, of Hamilton, Ont., vice-president, and Dr. Charles C. Talbot, of Edmonton, trustee, will take leading parts in the convention.

Over 1,500 Kiwans clubs across Canada and the U.S. will meet simultaneously. This united fellowship occasion will bring together over 80,000 men for an expression of gratitude for the community betterment and welfare work of Kiwanians during the past year.

All Kiwans clubs in Canada are observing Canadian citizenship week, June 28 to July 2, with patriotic programs. The observance is being directed by the Kiwans International committee on public affairs for Canada. It is Stanley Hignett, of Ottawa, is chairman, and Nelson A. Harkness, Vancouver, and Richard W. Moore, Saskatoon, members of the committee.

Exports Lower For May

Balance Of Trade Against Canada Was \$2,951,411

Ottawa, Ont.—The balance of trade was slightly against Canada in the month of May. Official figures issued through the Department of National Revenue show total exports of Canadian produce during last month at a valuation of \$40,594,404. In addition to this, exports of foreign products from Canada amounted to \$807,885, making total exports of \$41,402,289. Total imports entered for consumption during the same month were \$43,353,710, of which \$16,027,203 were free goods and \$28,326,507 dutiable.

The balance of trade against Canada during the month was \$2,951,411.

Will Attempt Speed For Nashville, Tenn.

New York.—Before taking off for Nashville, Tenn., Capt. Peabody, a veteran military and commercial aviator, said that within the next few weeks he planned a speed flight from New York to England, France, and Germany.

ROME'S "VIVA" TO FAMOUS FLIERS

Rome certainly tended an enthusiastic greeting to the aviators from all parts of the world who gathered at the Italian Capital for the recent Congress of Fliers. Shown here were the aviators as they were in procession. Inset shows Captain Sir Hubert Wilkins (left), famous Australian explorer; General Italo Balbo, head of the Italian Air Force; and Sir Arthur Witten Brown, with Sir John A. Macdonald, the first man to fly across the Atlantic. They left the tomb of Italy's Unknown Soldier after placing wreaths.

GOVERNMENT ENDORSED

Premier Bracken Of Manitoba

Big Car Contract

Ford Motor Company Of Windsor To Supply English Firm

East Windsor, Ont.—On his return from England recently, Wallace R. Campbell, president of the Ford Motor Company of Canada, announced that a contract had been entered into by his firm with the Ford Motor Company of England whereby the East Windsor plant of the Canadian company will supply the English firm with \$3,000,000 worth of Ford V-8 motors during the next 12 months and with 1,500 to 1,800 complete V-8 cars, scheduled for delivery in July.

The Canadian company will distribute the new 8 horsepower English Ford in its export markets, New Zealand, Australia, South Africa, Africa, Malay States and other British territories, while the English company will sell the V-8 in Great Britain, Spain, Sweden and other European and Asiatic countries, for which the English Ford company holds selling rights.

Mr. Campbell emphasized that the business was taken at extremely close figures and represents practically 100 per cent. payroll in Canada, not only at the East Windsor plant, but at Toronto and other tire and parts manufacturing centres.

Demand High Wages

Australian Jobless Refuse Pay Offered By Grape Growers

Sydney, Australia.—The dole has made some of the jobless here rather particular about the kind of work they are willing to accept. At Mudge, centre of the vineyard district, grape growers agreed to give preference of employment in the picking season to local men on the dole. They offered \$2.50 a day with meals and quarters added. The work was rejected.

Oil Refinery For Far North

Calgary, Alberta.—Imperial Oil, Limited, will operate an oil refinery in the Fort Norman oil field, C. O. Stullman, the president, announced. Mr. Stullman said the refinery would produce gasoline and oil for Great Lakes, Lake, mineral operations, and power boats on the Mackenzie River. It will be the most northerly refinery in the world, he said.

Explosion And Fire In Montreal Takes Lives Of Twenty-five Workers

Montreal, Que.—The slip of a machinist's drill was blamed by fellow workers for explosions that took some 25 men their lives, wrecked the oil tanker "Cybeline" and ruined the drydock in which the vessel was resting for repairs.

A night crew of nearly 500 machinists, riveters and helpers were swarming about the "Cybeline" rushing forward the work of repairing steel plates injured when she grounded on her way up the St. Lawrence. In her hold were thousands of gallons of fuel oil and a few feet away in the steel walls of the Canadian Vickers, Limited, drydock was a series of explosions occurred where wackiness tore in holes.

Dead to the warning of men nearby, Chief Raoul Gauthier, of the Montreal fire department, led three of his men down a ship in an heroic effort to save those below decks.

"Well men, come on," he cried and rushed toward the blazing companionway. There was another frightful explosion as the shimmering oil in the vessel blew up. The blasting liquid threw a fireball over the four masts. A moment later three firemen were dying before the horrified gaze of their comrades. Chief Gauthier had disappeared.

The known dead are 10, including the firemen, 17 are missing and approximately 40 are in hospital with injuries, many of them serious.

After extinguishing the fire and waiting for the steel plates to cool, the ship was moved to the drydock. It was unable to penetrate far enough to reach any holes.

Property damage has been estimated at from \$500,000 to several million dollars.

Burial Of Violet Sharpe

Brief Service Attended By The Acting British Consul General

Englewood, N.J.—Violet Sharpe, English servant girl in the home of Mrs. Dwight W. Morrow, was buried after a service attended by fellow members of the Morrow household and the acting British consul general. She had been instructed to make a report on the girl's suicide five days ago.

The simple cloth-covered casket was borne to a grave in Brookside cemetery, where rests the body of the late Senator Dwight W. Morrow, grandfather of the murdered Lindbergh baby, on the shoulders of four male employees.

No member of the Morrow or Lindbergh family attended the final rites, although they were represented by Arthur Springer, the late senator's brother-in-law, and Mrs. Josephine D. Graham, Mrs. Morrow's private secretary.

Battle For Stockyards

The Pas, Man.—Location of the stockyards for cattle shipments along the Hudson Bay Railway has led to a rivalry between this town and Hudson Bay Junction, Sask. Both towns want the yards, and a decision is expected within a few weeks. Two shipments of cattle over the northern route are expected this season.

Open Coastal Service

Vancouver, B.C.—The summer service between Vancouver and Skagway was officially opened by the Canadian National Steamship when S.S. Prince George, Captain Neil MacLean, sailed from this port June 13.

Bracken Government Returned In Manitoba General Elections

Winnipeg, Man.—Hon. John Bracken will be Prime Minister of Manitoba for another five years. The general elections resulted in the return of government candidates on a sweeping scale.

The result of the voting puts the stamp of popular approval on the recent Liberal-Progressive coalition. Col. F. E. Taylor, Conservative leader, declined to join a coalition government when it was proposed by Premier Bracken last autumn. He called for a general election in the province of Manitoba, but many of his followers went down to defeat.

Chief opposition to the government was provided by the Conservatives who contested practically every constituency in the province and waged a vigorous campaign.

With 13 candidates in the field, the Independent Labor Party waged a lively fight in Winnipeg and a few other ridings. Party returns showed only one Labor win, John Bracken, Winnipeg, elected.

from the spreading flames. Some succeeded in reaching the undamaged part of the drydock and then the shore. Others threw themselves into the river.

Rowboats went to their rescue. Two reporters, who arrived at the scene shortly after the first fighting apparatus, braved the scorching heat and saved four men who were plunging about in the water.

In the meantime the flames shooting out of the wall of the drydock, were playing on the steel plates of the "Cybeline" like a gigantic torch. As the oil inside the vessel became hotter a series of explosions occurred where wackiness tore in holes.

Dead to the warning of men nearby, Chief Raoul Gauthier, of the Montreal fire department, led three of his men down a ship in an heroic effort to save those below decks.

"Well men, come on," he cried and rushed toward the blazing companionway. There was another frightful explosion as the shimmering oil in the vessel blew up. The blasting liquid threw a fireball over the four masts. A moment later three firemen were dying before the horrified gaze of their comrades. Chief Gauthier had disappeared.

The known dead are 10, including the firemen, 17 are missing and approximately 40 are in hospital with injuries, many of them serious.

After extinguishing the fire and waiting for the steel plates to cool, the ship was moved to the drydock. It was unable to penetrate far enough to reach any holes.

Property damage has been estimated at from \$500,000 to several million dollars.

Winnipeg Bank Robbery

Bandit Ties Up Staff and Escapes With \$5,000

Winnipeg, Man.—A lone robber entered the Ceydion and Osborne branch of the Royal Bank of Canada here just before closing time Thursday afternoon, June 16, securely bound the small staff and made a neat getaway with \$5,000. The robbery was not discovered until one hour later.

With the exception of the staff of four, all the bank employees were taken to a grave in Brookside cemetery, where rests the body of the late Senator Dwight W. Morrow, grandfather of the murdered Lindbergh baby, on the shoulders of four male employees.

Stepping behind the counter he held the four employees at the rear of the premises, calmly but efficiently trussed them up with a coil of whipcord, scooped \$5,000 from the teller's till and then telephoned for a taxi.

One hour later, a passerby noticed the bank doors still open, passed to investigate. He found the four members of the staff lying on the floor, securely tied.

Open Coastal Service

Vancouver, B.C.—The summer service between Vancouver and Skagway was officially opened by the Canadian National Steamship when S.S. Prince George, Captain Neil MacLean, sailed from this port June 13.

Bracken Government Returned In Manitoba General Elections

Winnipeg, Man.—Hon. John Bracken will be Prime Minister of Manitoba for another five years. The general elections resulted in the return of government candidates on a sweeping scale.

The result of the voting puts the stamp of popular approval on the recent Liberal-Progressive coalition. Col. F. E. Taylor, Conservative leader, declined to join a coalition government when it was proposed by Premier Bracken last autumn. He called for a general election in the province of Manitoba, but many of his followers went down to defeat.

Chief opposition to the government was provided by the Conservatives who contested practically every constituency in the province and waged a vigorous campaign.

With 13 candidates in the field, the Independent Labor Party waged a lively fight in Winnipeg and a few other ridings. Party returns showed only one Labor win, John Bracken, Winnipeg, elected.

Mr. cabinet minister, Hon. Evan McPherson, one of the new Liberal recruits to the cabinet, went down to defeat in Portage la Prairie before the popular Conservative leader, Col. Taylor.

Stanford Evans, chief financial critic of the Conservative opposition in the Manitoba legislature, was assured of election in Winnipeg as early returns showed him far in the lead of the 28 candidates contesting the city's 10-member constituency.

Mr. Evans is one of the best known Conservatives in Manitoba, and is known throughout Canada as an authority on grain trade and business matters.

Mr. Roblin failed to win a seat to follow his father, earl. He returned to his political career. Sir Edmund was the last Conservative Prime Minister of Canada.

Mr. Evans is one of the best known Conservatives in Manitoba, and is known throughout Canada as an authority on grain trade and business matters.

Mr. Roblin failed to win a seat to follow his father, earl. He returned to his political career. Sir Edmund was the last Conservative Prime Minister of Canada.

Disarmament Responsibility For Its Ultimate Solution Rests Primarily With the Great Powers

Disarmament was a political problem and the responsibility for its solution rested primarily with the great powers. Sir George Fether, declared at Ottawa, Sir George, who headed the Canadian delegation to the Geneva disarmament conference, was addressing a joint gathering of the Ottawa branch of the League of Nations Society, the National Council of Women, the Women's Canadian Club of Ottawa, and the Canadian Club of Ottawa.

Efforts towards that end, he stated, had been initiated and carried on at Geneva by private conversations among the representatives of the nations chiefly concerned. Many things had occurred to interfere with and prevent the success of the recent negotiations. There were the elections in France; the illness of Premier Ramsay MacDonald; the death of the United States Secretary of State Stimson returning to his country; the precarious position of the German Chancellor Herr Brüning which had only recently resulted in his resignation. Much had been done in spite of circumstances, but progress said in voicing his belief in the work of disarmament and the League of Nations.

A most important resolution on qualitative disarmament had been passed at the Geneva gathering by unanimous vote to the effect that any armaments which were found to be either aggressive in character or particularly dangerous to the civilian population should be removed from national control.

The technical work of the conference was still progressing, Sir George stated, and political negotiations would be resumed later when it was hoped conditions would be more propitious for further progress towards the objective which all so greatly desired.

"Education and not emotionalism must be the basis for disarmament for the development of international good will leading to permanent peace and to disarmament," declared Miss Winifred Kydd, Montreal, president of the National Council of Women of Canada, and one of Canada's three delegates to the conference.

Miss Kydd dealt with the preliminary work of the Conference sub-committee on moral disarmament of which she was a member, having as its object an intense study of how the public opinion of all countries of the world may be mobilized in the interests of peace. The moral disarmament committee, Miss Kydd indicated, intends to utilize the press, the radio and the moving picture in its peace propaganda work.

Referring to the presentation of the petition for world disarmament at the conference, Miss Kydd stated that the Canadian petition, bearing 500,000 names, was given a prominent place when the petitions from all countries were placed on display.

Interesting Discovery By Archaeologist

Finds Another Secret Passage In Old Palestine City

Sir Flinders Petrie, the veteran archaeologist who has unearthed so many of the secrets of the past, is still actively excavating at Old Gaza, the great city of Palestine which was well known to Abraham. The latest announcement in connection with his work is the discovery of another secret passage leading from the city out into the desert. A great tunnel, leading under the walls and nearly 500 yards out, was discovered. It was found last year, and constitutes but one of the many features of the fortified city which military experts do not yet fully understand. Sir Flinders estimates that it will take another 50 years to excavate the area yet to be explored.

B.C. Salmon

British Columbia's output of canned salmon in the five-year period, 1927-1931, averaged 1,640,744 cases annually. Despite the fact that market conditions resulted in the 1931 output being much below normal, the average production in 1927-31 was only 92,000 cases below the average for the preceding five years.

In 1391 half of England's trees were archers, and by 1560 practically all of the archery troops were mounted.

The men used a bow about five feet in length, and a three-foot arrow.

Stings hold a spoon on a French inventor's device to be clipped to the edge of a kitchen utensil.

Making Final Test

Rest-Resistant Varieties Of Wheat Being Tried Out

For the purpose of considering and advising upon the solution of urgent problems of agriculture in all the main divisions of Canada—the prairies, Quebec and Ontario, the prairies and British Columbia—the newly-formed national advisory committee on agriculture of the National Research Council met in Ottawa.

Dr. H. M. Tury, president of the council, stressed the need of co-operation and co-ordination in working out national problems.

Dr. Robert Newton, acting director of the division of biology and agriculture, recounted the enormous progress made in the last decade, through research organizations working in co-operation.

He stated that rest-resistant varieties of wheat from all the agencies which developed them have been pooled for final test. Those selected are being tried out at numerous points, and the resulting grain is to be studied by laboratories in the Dominion Department of Agriculture and the three provincial universities in the west.

The grain research committee since its inception has undertaken several major special investigations. Dr. Newton and his staff were now in press the final report on the investigation of the drying of grain "which should clear up all points likely to arise."

Numerous complaints regarding the effect of the combine method of harvesting on grain have resulted in the inauguration of an elaborate investigation.

Scottish Market For Cattle

Good Prices Are Obtained For Cattle Shipped From Saskatchewan

Higher prices than anticipated have been realized on the first shipment of Saskatchewan cattle to Scotland, according to a report received by the department of Agriculture from G. B. Johnson, Canadian Trade Commissioner at Glasgow.

The Scottish market offers a good price for choice steers, weighing from 10 to 11 hundred weight, capable of being made into prime beef with three or four months' fattening, according to Mr. Johnson. The market absorbs many of this type between April and July, in the spring season, and from September to December, in the autumn.

Grow Fat And Laugh

According To London Doctor Laugh Comes Second

Having believed for so long in the advice "eat, drink and be merry, for we must change our ideas according to a London doctor, who finds that the growing fat provides the laughter of his study of children he has found that fat babies are the happiest, good temper runs in families and girls have better tempers than boys.

So there goes by the board that other belief that the fat man is good tempered because he is too good either to quarrel or run away. His just can't help his happiness and serenity.

Funds Quite Safe

Business was over for the day and the two partners had adjourned for a game of snooker in a nearby hall. As the evening was nearing its end and they were preparing to go home one of them clipped his hand against his brow and emitted a shrill scream.

"We're ruined! We're ruined!" he shrieked. "I just remember that I left the safe door open when we closed the shop."

"Oh, that's all right," replied his business mate easily. "We're both here, ain't we?"

Refitting Old Vessel

Clipper Ship Built In 1876 Will Sail Sea Again

The day of wooden ships and iron men has not yet gone by. The bark "Coriolanus," once "Queen of the Jute Clippers," has sailed for Bath, Me., to be fitted out in the same powerful square rig in which she established a sailing record between London and Calcutta years ago.

Refitted, the then full-rigged clipper ship will sail out of Boston to again engage in trade with Africa. She has sailed under six flags over the seven seas. Her crew has charmed the waters of the Arctic and the tropics and she has survived hurricanes and fire at sea to become last of the old New England clipper ships still in service.

A syndicate headed by C. Nelson Rogers of Boston recently purchased her and she will return to that port immediately after her new repairs have been completed at the Bath Iron Works, Bath, Me. At Boston she will take on a cargo for a trading voyage to Africa.

She was built at Dumbarton, Scotland, in 1876, and was awarded a gold medal by the Honorable Shipwrights' Guild of London for the most beautiful lines of any clipper ship then afloat. The "Coriolanus" established a record of 69 days between London and Calcutta and the record has never been bettered by a sailing ship.

In recent years she has engaged in the packet trade between New Bedford and the Cape Verde Islands.

Foreign Crop Regulations

Rule Governing Production Of Registered Seed To Apply

Regulations governing the production of registered seed in future will apply to foreign crops, delegates to the annual convention of the Canadian Seed Growers' Association decided. The committee of experts on the subject, was adopted at the meeting held in Winnipeg.

Notes given in the recommendations mention approved methods of designating strains of foreign crops, progress in the registration of corn and red clover, and recognition of strains and specific types within varieties of foreign crops.

Cost Of Horse Labor

Records Show Cost Of Work Horse At Six Cents Per Hour

The Superintendent of the Federal Experimental Station at Indian Head, Sask., has provided some interesting and timely information about the seasonal cost of work horses under prairie conditions.

From the records kept in connection with seven head the average cost of feed for the season of active farm operation was \$82.15, while the average number of hours worked was 1,846, which represents a work value on the basis of 6 cents per hour, or \$10.08.

Still Ding Good Business

That the horse has not been replaced by machinery on modern farms is shown by the fact that the Canada Wood Specialty Company of St. Marys, Ontario, is now filling an order for 75,000 curly comb handles. The wood is used principally for cleaning horses, though curly comb supply goes to fishermen. An average of about 500,000 are sold annually in Canada.

Arsenic can be used advantageously in wood preservation processes.

QUEEN MARY ADMIRES BEAUTIFUL SHOW

Sixteen hundred rubber baggages, exact replicas of those used by British troops in a battle with Russian infantry on the slopes of Iakman in October, 1854, are being manufactured by a British firm for use in a Crimsen fighting scene which will be part of "The Alderbrook Tattoo," to be staged at Rushmore Area. The baggages are said to look exactly like the real thing with their silver-grey blades and black handles.

It took George Forbes, of Illinois, Wisconsin, only two weeks to build a seven-foot model locomotive, in which only steam pipes and rods are of metal.

Emissaries Of Scottish Commerce Receive Splendid Reception On Their Recent Visit To Canada

When the emissaries of Scottish commerce and industry came to Canada recently, they found the opportunities for developing markets here so much more promising than was anticipated that some fifty per cent of the group extended their stay from the scheduled five days—May 16 to 21—to several weeks. Hereafter bound, therefore, the Scottish Trade Mission mustered a greatly reduced personnel, some of those who remained behind having decided to traverse the Dominion to Vancouver, others, to further cultivate and solidify valuable connections made in the St. Lawrence port city.

Nice did all the exhibits so carefully selected and arranged in response to the Canadian public with the quality of Scotland's products return to the warehouses of Glasgow. A number of the exhibitors made direct sales of all the stocks they brought with them for show purposes.

Mr. Robert Chapman, dog fancier, set the pace in this field, disposing of the dozen aristocratic Scotch terriers which he brought over on the first afternoon that the exhibition was open to the public.

Direct sales were of course a small factor in the success of the Trade Mission, nor did orders booked constitute the most significant feature of the venture from the point of view of the Scottish commerce. The visiting traders, all keen business men trained in the school, were quite ready to realize that the Dominion offered them big opportunities for future business. They found that Canada was a potential buyer worth courting.

Mr. Chapman has found that the day of the buyer going to the seller is past and that the seller must come to the buyer. He commented Mr. A. M. Vanden, British Government Trade Commissioner at Toronto, when asked his opinion as to the most significant result of the Trade Mission visit.

But the discoveries were not all for the visitors. Canadians—not only the people but the business regulations—primarily as a colourful spectacle—but hard-headed business men who were without undue prejudice to goods and men, were convinced that Scotland produces certain commodities in higher than can Canadian producers, at present at least, and that these commodities fill a legitimate demand in the Canadian market without undue prejudice to native products. They learned that if they would continue to sell farm produce, raw materials and certain manufactured goods to Scotland, they should also be ready to buy those goods for the production of which the old land is particularly suited, either by its natural conditions or by its climate or the long experience of her craftsmen handed down from father to son for generations.

Mr. James Craig, president of Colville's limited, a famous Scottish industrial firm, emphasized this last point in his address to the business men gathered to welcome the mission.

Trade between Montreal and Glasgow cannot continue a one-way trade, he stated. "All that Scotland needs is a reciprocal trade. Canadians must realize that they have to buy in Glasgow if they would continue to sell there."

Those in charge were not merely business men, anxious to seize on any possibilities of a sale. They were representatives of the old historic Scotland, eager to tell her romantic story, to welcome those of Scottish descent, and they were legion, and gave them news of home. Afternoon and evening they were besieged by men and women who sought help in locating the tartan worn by their forefathers. They became centres of impromptu reunions of Scotch-Canadians, many of whom allowed the highland accent to regain temporarily a dominance in their speech which it had lost long years ago.

Referring to this cordial atmosphere, a remark made by Mr. Wm. Fraser, British Trade Commissioner at Toronto, who was sent over to Scotland to cross the ocean with the Trade Mission was closely associated with it throughout its stay here, is significant.

"Had the mission come here purely on a hard business basis it could not have met with anything like the success it attained," he commented in the course of a personal interview. "It was lifted to a higher plane by the spirit in which it set out and the spirit in which it was received here. It may be said that the people of Scotland was strikingly personified in the honorary president of the mission, His Grace the Duke of Montrose, whose presence contributed greatly to the splendid impression left in Canada by the Scottish Trade Mission."

Chief of staff and spokesman and the plaid of the ancient clan of Graham and wearing, among other insignia, that of the Knights of Nova Scotia, indicating the part which his ancestors played in the colonization of Canada three centuries ago, the Duke represented Canadian business men when the members of the mission were hosts to leading Montrealers and businessmen and trade officials from the Dominion capital—Agricultural and Industrial Progress in Canada.

Norfolk Fishermen Are Superstitious

Claim Weather-Van Dyeing Crew Brings Bad Luck

Mariners are notoriously superstitious.

The local governing council of Cromer, the agreeable little township on the Norfolk coast, is respecting the superstitions of the fishermen. In regard to a weather-van depicting a large crew which was erected near an aqueduct on the river, the council say the weather has been excellent but since the van was put up, and they have not been able to catch so many crabs and lobsters. The crew, they assert, is "a bad of ill-omen," and an emblem of death.

In deference to these representations the van is to be taken down and a new one, depicting a ship in full sail, is to be set up.

Standardized Automobile Insurance

New Plan Comes Into Effect In Ontario This Year

Standardization of automobile insurance policy forms becomes effective in Ontario September 1, the province's insurance department announces.

The insured motorist will be automatically responsible to his victims in the event of an accident. The standard form says that every company shall be liable to the victim of an accident under all circumstances. If the policy holder has violated the statute, the company must seek redress against him.

Encouragement Needed

To Attract Incoming Cargoes To Port Of Montreal

The opening of ports on the Gulf of Mexico did not hurt, but rather helped, United States Atlantic ports, and there is no reason to believe that the opening of Churchill will injure any other Canadian port. Unfortunately, there are always short-sighted people who do not see it that way, and Churchill will continue to receive adverse publicity from Eastern Canadian ports.

Another method of publicity—such as special encouragement should be given to attract incoming cargoes to Churchill—Winnipeg Tribune.

Gravity Comparisons

Measurements of the Force of Gravity at Various Points Throughout the Country are Made by the Dominion Observatory, Department of the Interior, Ottawa.

This involves the measurement of the period of a pendulum to one ten millionth part of a second—a decidedly delicate operation. Results of these investigations are intended to throw light on the nature of the upper layers of the earth's crust, and are closely related to geologic formations and structures, such as such phenomena as denudation and mountain-building.

Two New York architects have designed nine-story apartment houses supported on piers, leaving open spaces for children's playgrounds on the street level.

What do you say to your wife when you go home late?

"I say 'Good Evening' and she says the rest."—Hummel, Hamburg.

CARTER'S PILLIPS

WORLD HAPPENINGS BRIEFLY TOLD

The National Government has contracted with a group of former military aviators to develop a Chinese air force.

Annela Eshart received the Order of Leopold from King Albert of the Belgians in recognition of her solo flight across the Atlantic.

On her first trip to the Strait of Belle Isle this season, the Canadian Pacific flag ship "Empress of Britain again broke the record for Atlantic crossing.

Col. Herbert Swinford, veteran of the Red River Rebellion in 1870, and the North West Rebellion 15 years later died in Winnipeg at the age of 83.

Prof. J. W. Gregory, Scottish geologist, and head of a scientific expedition studying earth movements in the Andes, was drowned recently, a brief wireless report said.

The total value of output of the British Columbia "Empress" in 1933 was \$110,922, compared with \$123,103.80 in the preceding year, according to a report issued by the Dominion Bureau of Statistics.

The fruit bill of the United Kingdom went up by nearly \$32,000,000 last year, according to a report issued by the empire marketing board, with oranges for the first time in history proving the popular leader. Apples, millions of which came from Canada, were second.

Nearly 7,000 persons were killed and more than 20,000 injured in road accidents in England within the last twelve months, according to parliamentary returns. In London Metropolitan Police District alone, 1,296 persons were killed and more than 5,000 injured.

British Columbia lumbermen will send a trade delegation to China to foster trade with that country if a suggestion put forward by Hon. Nelson Lougheed, Minister of Lands, to the executive of the British Columbia Lumber Manufacturers' Association is adopted.

Not Much Difference

Vegetarians Healthy But Slow in Generating Body Heat

Experiment running over two years has been concluded at Kansas City where a professor has been observing 70 vegetarians and comparing them with meat eaters. He finds that the vegetarians do not generate body heat and energy as quickly as meat eaters, placing the difference at 10 per cent. The vegetarians, he said, do not appear to be more active or intelligent than any others, and they are more apt to become sick. Apart from generation of heat he could see little difference in the two plans of diet.

New Discovery Valuable

Makes 25 Percent Evaporate Platform Like Water

Platform is caused to evaporate like water by a discovery announced from the California Institute of Technology. This precious vapor, probably the world's highest-priced mist, condenses into unimaginable thin films upon a wide variety of materials. It coats them virtually permanently. Smoother than velvet it will cover fire, converting them into plastic. Many threads that seem made of pure platinum.

"Is your daughter going to practice on the piano this afternoon?"

"Yes."

"Well, then you please lend me your lawn mower? I have to do the lawn some time, anyway?"

PERSONAL

SCOTTISH LADY AT PRESENT IN

Canada, anxious to take in charge an 12 more years. Has experience in travel abroad, and with Canadian girls could act as companion to lady, in the home, or as travel companion. Has excellent testimonials both in Canada and in Britain. Would willingly give more information to interested party—Apply Box 50, Winnipeg Newspaper Union, 175 McDermott Ave., East, Winnipeg, Man.

Had Original Ideas

New South Wales Bandits Out After Big Zig

These are days of mysterious accidents, peculiar robberies and dastardly crimes of all descriptions. But one could not help but smile at the news despatch from Sydney, N.S.W. There bandits stole a brick wall 30 feet long and six feet high. Others took 30 locomotives all excepting the frames. While still others carried off part of a church. This story is somewhat along the lines of one of the "rackets" in the United States where high-pressure thieves will back a moving van up to a home or an apartment and if nobody stops them, take the entire furnishings in one trip.

Keeping one's possessions is not as easy as it is used to be, not even as easy as in the days when might meant right.

Leadership Of Prince

Heir To British Throne Is More Than Theorist

Because of his commanding position as heir to the British throne and on account of his personal popularity, the Prince of Wales has an unusual opportunity for public service of a practical nature, and of this opportunity he is taking full advantage. He is more than a theorist, and whether his audience be composed of business men, industrialists or farmers, he speaks to them in their own language. They realize that he has made himself familiar with their problems. Leadership is the great need of the day, and this his Royal Highness is demonstrating in an energetic and practical manner.

In my last article, I discussed the Official System of Contract Bridge, from the standpoint of the fundamental differences between it and the Approach-Forcing System. Today's article has to do with the so-called One-Over-One variation of both these systems.

The One-Over-One has been developed by Geo. Reith of the Knickerbocker Whist Club, New York. Many of the members of the club have assisted in the development of this system to its present state of excellence. The four horsemen of bridge, as they are called, are: Harold Karp, and Oswald Jacoby use this system and have won many national and sectional championships.

Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system has helped them materially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same minimum requirements as the Approach-Forcing System, with the exception that with strong distributional hands, i.e. two Aces, the bidding may be opened with less than two and one-half honours or tricks. An example of this opening would be the following—Spades: A P 8 7, Hearts: K Q X X, Diamonds: X, Clubs X X.

2nd. Provided there is no intervention bid and the partner of the opening bidder responds with a bid of one or more than one trump, this response is definitely forcing and demands that the original bidder keep the bidding open for at least one more round. The difference between the Approach-Forcing and the One-Over-One is that, any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One force simply requires that the bidding be kept open for at least one more round.

Example: If the opening bidder bids one diamond and second hand passes, then if the opening bidder's partner bids one heart, the original bidder must bid again. The advantages claimed for this system by its advocates is that, the partners inform each other of their respective holdings at low bids, and also that this bidding conceals from the opponents both the strength and weakness of the bidding hands. Where the hands are strong there is always the danger that the original bidder keeps a defensive bid and find themselves caught between the upper and nether millstones with the result that they suffer a substantial penalty.

3. The opening bid of two in a suit is based on losing tricks and not on honor tricks. In other words, two in a bid is made on hands which definitely assure the partnership of game even if the partner of the two bidder has a complete "bag" of five hands which lend themselves to this bid are usually powerful two in a bid.

4. The opening bid of three in a suit is based on losing tricks and not on honor tricks. In other words, three in a bid is made on hands which definitely assure the partnership of game even if the partner of the three bidder has a complete "bag" of five hands which lend themselves to this bid are usually powerful three in a bid.

Example: Spades: A Q J X X, Hearts: A K X X X, Diamonds: X, Clubs X X. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

5. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

6. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

7. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

P. L. C. Bond, general superintendent for C.N.R., Montreal district, congratulating C.N.R. brakeman Donat Cyr, of Montreal, after Cyr has received a new automobile—the prize he won when P. D. Jacob, for 15 years Dominion Graphophone, and other judges decided that his writing was more interesting than any of the thousands submitted in the Imperial Tobacco's first series of contests wherein competitors wrote on the inside surface of Turret cigarette packages. At the left is W. B. Tighe, director of the tobacco company, A. Desrosiers, sales manager, and J. B. Gibeault, superintendent for C.N.R., Montreal district, and the winner himself, halloo. —Photo, Canadian National Railways.

Contract Bridge

By Hamlin B. Hatch, Cleveland Club, Toronto

In my last article, I discussed the Official System of Contract Bridge, from the standpoint of the fundamental differences between it and the Approach-Forcing System. Today's article has to do with the so-called One-Over-One variation of both these systems.

The One-Over-One has been developed by Geo. Reith of the Knickerbocker Whist Club, New York. Many of the members of the club have assisted in the development of this system to its present state of excellence. The four horsemen of bridge, as they are called, are: Harold Karp, and Oswald Jacoby use this system and have won many national and sectional championships.

Whether their winning has been due to the One-Over-One or to the fact that all four of these men are master players, is not certain. However, it is probable that the system has helped them materially in their successes.

The salient features of the One-Over-One are as follows:

1. The Opening Bid of One has practically the same minimum requirements as the Approach-Forcing System, with the exception that with strong distributional hands, i.e. two Aces, the bidding may be opened with less than two and one-half honours or tricks. An example of this opening would be the following—Spades: A P 8 7, Hearts: K Q X X, Diamonds: X, Clubs X X.

2nd. Provided there is no intervention bid and the partner of the opening bidder responds with a bid of one or more than one trump, this response is definitely forcing and demands that the original bidder keep the bidding open for at least one more round. The difference between the Approach-Forcing and the One-Over-One is that, any bid which is forcing in the Approach-Forcing System requires that the bidding be kept open until a game contract is arrived at while the One-Over-One force simply requires that the bidding be kept open for at least one more round.

Example: If the opening bidder bids one diamond and second hand passes, then if the opening bidder's partner bids one heart, the original bidder must bid again. The advantages claimed for this system by its advocates is that, the partners inform each other of their respective holdings at low bids, and also that this bidding conceals from the opponents both the strength and weakness of the bidding hands. Where the hands are strong there is always the danger that the original bidder keeps a defensive bid and find themselves caught between the upper and nether millstones with the result that they suffer a substantial penalty.

3. The opening bid of two in a suit is based on losing tricks and not on honor tricks. In other words, two in a bid is made on hands which definitely assure the partnership of game even if the partner of the two bidder has a complete "bag" of five hands which lend themselves to this bid are usually powerful two in a bid.

4. The opening bid of three in a suit is based on losing tricks and not on honor tricks. In other words, three in a bid is made on hands which definitely assure the partnership of game even if the partner of the three bidder has a complete "bag" of five hands which lend themselves to this bid are usually powerful three in a bid.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

5. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Example: Spades: A Q J X X, Hearts: K Q, Diamonds: X, Clubs: A K. In this hand even with a six high in partner's hand, game is assured, as the original bidder has only three losing tricks.

6. The opening bid of three in a suit is a definite slam signal. It is a stronger bid than the two bid and demands that the partner of the three bidder bid a suit of which he has the ace. If he has no ace, he makes the conventional response of three no trump.

Life Has Been Exciting

Eighty-Five Year - Old Englishman Cannot Claim Of Monotony

Sir Claude Champion De Crespigny, 85, writes the New York Times, "I served both with the Royal Navy and the Army, entering the Royal Navy when only 15 years of age, has just celebrated his 85th birthday. Sir Claude is feeling much better this year than last. With Lady De Crespigny he has just returned to England from a six-week trip to the West Indies, and that has done them both a lot of good. He does not feel any ill-effects from the fourteen bones which he is said to have broken during his many years of sporting activities. He broke two ribs while balling, three ribs at sleepwalking, three fingers when boxing, another through a horse's kick, and was nearly scalped by a favorite monkey. "One of my tightest corners," he has said, "was when I jumped into a river infested with sharks to save a horse's life." Once again Sir Claude fought a waterman with bare fists for an hour and a half, and although one of his fingers was broken he did not stop to get a plaster bandage. He has also fought a python, escaped from a tiger, fown a minister's remarks in view of the fact that it is reported that he is a soldier climbed steeples. His house is full of trophies and medals which he has won.

Jail Population Less

Alberta Penal Institutions Have Fewer Inmates Than For Some Time

Alberta jails have at present a smaller population than for some time past. It is stated by Mr. McPherson, Minister of Public Works, that the decrease in jail population in Alberta is the more satisfactory, the minister remarks in view of the fact that it is reported from Regina that the Saskatchewan jails are filled at the present time. A report from the same quarter indicates also that the policy of granting prisoners remission on their sentences, in consideration of good behavior, is being applied. This method has been in vogue in Alberta, Mr. McPherson says, for a considerable time, sentences being shortened on the basis of four days per month in cases found to be deserving of such leniency.

Carries Stock In Clothes

Montreal Pedlar Hungry Articles On Waterfront, Lay Claim to Being Stocked with "everything from an anchor to a pair of pants"

Many stores, usually found on the waterfront, lay claim to being stocked with "everything from an anchor to a pair of pants." One of the most prominent of these is the "Ziehl Goldfarb, a pedlar, who piles his trade in the central part of Montreal, carries his stock right on his person. He carries a supply of goods enough to meet the requirements of all customers. But he has no anchors for sale, and the probable reason is his seventy years of age. For eight years now Ziehl has straddled to taverns and restaurants, opened his stock as displayed, hanging from hooks there, articles ranging from rubber bands to shaving paraphernalia. His stock seems inexhaustible.

Lack Representation

Federal Government Has Low Percentage Of Farmer Members

In the Senate of Canada there are 98 members, and of these but 11 are farmers. With 46 per cent. voting population the rural constituencies have but 12 per cent. representation in the Senate, and 10 per cent. in the House of Commons. So that the status of the little attention paid to farmers' complaints and to agricultural interests lies in the lack of representation. A profession which represents the largest percentage of any profession within the country is underrepresented, and it is particularly the most highly organized unions and professions of other kinds.

Reason Is Obvious

An eminent American lawyer went to London recently to study the British legal system. After studying the English lawyer undertook to show him round the Law Courts. They listened to the cases and the lawyer explained all the fine points of the administration of British justice. The American said afterwards: "There is no doubt that your system is better than ours. But I cannot understand why. After all, in America we have got the very best judges that money can buy."

Chases Largest Dog

The Hon. J. G. Gard, British minister at Chatham, Leicestershire, England, claims ownership of Britain's largest dog, an Irish wolfhound. Three feet high at the shoulders, it weighs 154 pounds, the dog is as large as a donkey.

NEURITIS HAS GONE!

Banished by Kruschen

"I had acute neuritis in the shoulder and left arm, due to exposure in bad weather," writes the Rev. R. E. D. "It was impossible to lift the arm to the head, and the pain was insupportable, the pain was dreadful. All external applications were useless. I got completely normal again by keeping the parts affected warm and taking daily sips of the hot water. Kruschen Salts in a tumbler of hot water. It took only a few days, and every vestige of neuritis has gone."

"I have suffered from a dozen other complaints—some minor, some very serious—since I have taken Kruschen salts in the form of hot water. It is pure in the blood. And it is impure blood, circulating all over the system and setting up inflammation in the tissues, that causes those excruciating pains."

Kruschen Salts can be safely trusted to set the matter right. Because Kruschen contains just what Nature needs to persuade your internal organs back into a healthy, normal condition.

Entirely New Reason For Atlantic Flight

Doctor Hopes To Obtain Valuable Information As To Strain Imposed

By the Atlantic to gather medical information on the strain imposed on aviators during long-distance hops is to be undertaken shortly by a New York physician, a veteran commercial pilot and a girl who holds a limited commercial flying license.

The three are planning to fly non-stop from New York to Rome in the "plane which Clyde Pangborn and Hugh Hudson used in their flight around the world."

Dr. Leon Piccoli, of New York founder of the Flying Nurse Association, will be a passenger. William Ulrich, of Mineola, L.I., will be chief pilot, and Miss Edna M. Newcomer, of Hempstead, L.I., will be co-pilot. Miss Newcomer plans to make a parachute jump over Florence, Italy. Dr. Piccoli intends to place both Ulrich and Miss Newcomer in a rigid diet before the flight. He hopes to obtain valuable information on stamina, fatigue, diet and sleep schedules.

The plane is being conditioned at Roosevelt Field.

In Search Of Treasure

British Adventurers Locate Sunken Spanish Galleon In Southern Seas

A band of British adventurers who are seeking Spanish treasure made contact recently with a galleon on the bed of Chaguanarua Bay, Trinidad, gold, which they hoped was crammed with gold ingots and precious jewels. The galleon was discovered by a "diving spring" owned by Frank Cooper, one of the leaders of the search. The galleon was discovered recently in the "Vigilant," a tiny vessel, in the hope of making a great fortune.

It was reported that the "Vigilant" was circling over the bay, the "divining spring," held in Cooper's clenched hands, leaped from his grasp.

Chaguanarua Bay has long been looked upon as a place where treasure might be found. It was there that the Spanish were defeated by the British in a decisive naval engagement near the end of the eighteenth century. The legend is that the Spanish fleet contained one vessel loaded with rails and gold and gems.

Special Fellowship Awards Announced

Students Of B.C. and Saskatchewan Are Among Winners

The school of graduate studies in the University of Toronto, has announced awards of special fellowship open to graduates of other Canadian universities.

The successful candidates are: J. R. Daniels Deal and Miss M. J. Fisher, University of British Columbia; H. M. Chisholm, Dalhousie University, Halifax, N.S.; E. O. Trautman, University of Saskatchewan.

Columbus, on his second voyage to the New World, brought sugar cane to San Domingo.

"Have you any brothers and sisters?"

"No, I am the children."

"Have—I am the children."

"No, I am the children."

"Have—I am the children."

"Have you any brothers and sisters?"

"No, I am the children."

"Have—I am the children."

"No, I am the children."

"Have—I am the children."

"Have you any brothers and sisters?"

"No, I am the children."

"Have—I am the children."

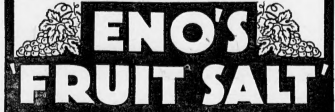

"No, I am the children."

"Have—I am the children."

Keep Health the Eno Way

You do not have to use drastic and strong cathartics that cause irritation. ENO'S "Fruit Salt," by gently and safely ridding the intestinal tract of poisons, will help to make you and keep you healthy. A dash of ENO in a glass of water every morning or night prevents the evils of constipation. Be ENO conscious!

CWS

THE HOUSE OF DREAMS-COME-TRUE

By MARGARET FEEDER
Author of
"The Splendid Days of the Herald of Far West"
Hodder & Stoughton, Ltd., London.

CHAPTER XXIII.—Continued.

"Then, to please me for nothing else in the world, if you like, but because I ask it—will you let things stay as they are for a few weeks longer? Just that little while, Nick? We're going to London next week. That'll make a break—bring us all back to a calmer, more everyday outlook on things. Will you wait? Sir Adrian may never strike Claire again. And it wouldn't be fair—just now, at a time when she is feeling horribly bitter and humiliated from that—bad insult—to ask her to go away with you. Give her a fair chance to decide a big question like that when things are at their normal level—not when they are worse than usual. To ask her now would be to take advantage of the feeling she must have, and at this moment, that her life is unbearable. It wouldn't be playing the game."

He made no answer, and Jean waited with increasing trepidation. She was sure now that she could hear footsteps. Someone had mounted the stairs and was coming along the corridor towards her room.

"Nick!" The low, agitated whisper burst from her as she stepped hastily outside the door. "Promise me!"

You can cook 3 vegetables AT ONCE

in the same saucepan by using CANAPAR

Do each vegetable up in its own bag of Canapar Canskyer. There won't be any odor, not even from cauliflower. All the food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix! Do the same with boiled or steamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No saucepan or kettle to clean up after roasting meat, line your pan with Canapar. Fats and juices won't burn. No more scraping or scouring of the pan afterwards. You can use Canapar repeatedly by simply rinsing it off and hanging up to dry. It doesn't absorb odors. Makes a perfect dish cloth. Silks, stockings, and doesn't scorch. Made by the makers of the famous PARASOL Heavy Waxed Paper in the Green Box.

Special Offer
Most grocers, druggists and department stores have Canapar on sale. If you don't find it, send this coupon direct to the makers and we will give you a new and unique booklet entitled "Lettovers," containing one hundred recipes as a bonus for your trouble.

Applied Food Products, Ltd., Hamilton, Ontario.

Enclosed find Six for which please send me one full size package of Canapar. Put this coupon direct to the makers and we will give you a new and unique booklet entitled "Lettovers," containing one hundred recipes as a bonus for your trouble.

that we weren't meant to run away from things—hard things. If a man and a woman marry they must accept their responsibilities—not evade them."

So absorbed was she in her trend of thought that she never realized how directly this speech must strike at Blaise himself. His face changed slightly.

"You're right, of course," he said abruptly. "You—generally are. And if all women were like you, it would be easy enough."

His eyes dwelt with curious intensity on the pure outline of her face, on the parted, tenderly curved lips, and the golden eyes with their momentary touch of the idealist and the dreamer.

It seemed as if the quiet intensity of his regard drew her slowly as he turned her head and met his gaze, flushing suddenly and faltering under it. The consciousness of him, of his nearness, swept her from head to foot, and it seemed to her as though now, in this moment, they were in closer touch, nearer understanding, than they had ever been.

She stood very still and quiet when he had gone, realizing in every quivering nerve of her that whatever the future might bring—even though Blaise might choose to shut himself away from her again as in the past and the dividing wall between them rise as high as heaven—she knew now, without a shadow of doubt or questioning, that he loved her.

In the burning utterance of a single word, in the pressure of passionate, renouncing lips, the assurance had been given, and nothing could ever take it away again.

She spread her hands, palms upward, and looked at them, curiously.

CHAPTER XXIV.

An Unexpected Meeting
"Have you been very bored, Nick?" The week in London had nearly run its course, and the Lady Anne eyes begged charmingly for a negative. Nick nodded it with a smile.

"I'm never bored with you, madam," said Blaise. "And a hotel life is always more or less amusing. One comes across such queer types. There's one here this evening has been intriguing me enormously. At a little table by herself—do you see her? A tall, rather grotesque-looking being—kind of cross between the Queen of Sheba and Lucretia Borgia."

Lady Anne threw a veiled glance in the direction indicated.

"Yes, she's a very handsome woman, obviously not English." Her eyes traveled on towards the tall, dark figure. "I wish Blaise and Jean would hurry up," she added impatiently. "They're taking an unconscionable time to dress."

The two latter had come in late from a night-sewing expedition undertaken on Jean's behalf, and had only returned to the hotel just as Lady Anne and Nick were preparing to make their way in to dinner.

"For such a deliberate matchmaker," commented Nick teasingly. "That they should have stayed out together all the very last minute—ought to have pleased you immensely."

Lady Anne made a small grimace.

(To Be Continued.)

Fish and How To Cook It

Domination Department of Fisheries Issues New Booklet Printed in Both French and English
Copies of the new book, "Fish and How To Cook It," which has been issued by the Domination Department of Fisheries, are now available either in French or English at a price of ten cents each. The booklet has been prepared under the direction of Mrs. Evelyn Spencer, specialist in fish cookery, who is a member of the department's staff. It gives authoritative information and is designed to meet the needs of the average Canadian household. Persons wishing to receive the booklet should write the Deputy Minister of Fisheries, Ottawa, enclosing ten cents for each copy received and stating whether the English edition or the French edition is desired.

Trying Out New Plan

Celery To Be Cultivated In Canada For Bermuda Growers

A plan to cultivate celery in Canada between Bermuda and the United States has been made known by W. R. Evans, marketing adviser to the Bermuda Department of Agriculture. It is understood that an expert is coming to Montreal to plan the first season. The scheme would advance the opening of celery shipment from Bermuda, Canada by two or three months.

It pays in pleasure—and pays in actual cash.
For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 50 cigarettes with a 20c package.

FREE Chantecler cigarette papers with every package.

15c and 30c packages also in 3 1/2 lb. vacuum tin

TURRET FINE CUT Cigarette Tobacco

Painting Eiffel Tower

Engineers Think Structure May Become Menace In Twenty Years

The Eiffel Tower is forty-five tons heavier than it was last year. That is the amount of paint that forty-five painters are applying to the giant steel skeleton, still the third highest structure in the world. Only the Empire State and Chrysler Buildings in New York are taller.

Paris engineers went over the tower on an annual inspection and found it in good shape. Several engineers say that it can stand for another century before it will have been worn out by the elements, but most engineers agree that it may become a menace in twenty years.

By 1950, Eiffel Tower may have to be torn down or rebuilt, the process of building being such a costly and difficult task that Paris may easily lose the most visible feature of its skyline. The base of the great tower is stronger than its top and this is explained by the fact that the top ways in high winds and twists the metal.

The tower is being painted yellow and brown, which all Parisians agree is not pretty. Engineers say that paint of those two colors will increase the life of the tower. One American firm offered to paint the tower with aluminum paint just for the publicity but this was opposed.

Wise and experienced mothers know when their children are troubled with worms and lose no time in applying Miller's Worm Powders. A most effective vermifuge. It is also useful in clearing the system of worms and restoring those healthy conditions without which there can be no comfort for the child, or hope of robust growth. It is a most trustworthy worm exterminator.

How "Milliner" Originated

Word Was Formerly "Milner" Given To Milne Merchants
Milan, in Italy, was once the great center of trade in silks, velvets, and other fine wearing apparel, and any merchant dealing in Milan goods was known as a Milner. In addition to hats and gowns, gloves and stockings, the original Milanese also dealt in glass, cutlery and linens. As trade became more specialized, however, the Milner, or milliner as he gradually became known, confined his attention to women's wear, and finally to hats alone.

Women Outnumber Men

A fifth of the total population of Scotland is concentrated in Glasgow, the decennial census figures, now made public, show. The population of Glasgow is given as 1,088,641, of 107 females for each 100 males. In Edinburgh the women outnumber the men by 12 to 10.

Alaska seal herd is estimated at more than 3,000,000 animals.

Little Helps For This Week

"Come unto Me, all ye that labour and are heavy laden, and I will give you rest."—Matthew 11:28.

Come, said Jesus' sacred voice, Come and make my path your choice; I will guide you to your home, weary pilgrim, hither come. Sinners, come! for here is found Balm that flows for every wound, Rest, eternal, sacred, sure.

Christ's invitation to the weary and heavy laden is a call to begin life over again upon a new principle. "Watch My way of doing things," He says. Follow me, take life as I take it, be meek and lowly, and you will find rest!—Henry Drummond.

Relieve Asthma At Little Expense. Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the nation's remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply you.

Backwest Destroys Weeds. Among the many uses of backwest as a field crop perhaps none is more important than its value as a weed destroyer, states crop specialists of the Domination Experimental Farm. Its value in this connection arises from its quick germination and rapid growth. The fact that two crops of backwest can be raised during one year usually makes it particularly effective in the eradication of even such difficult weed problems as those presented by the Sow Thistle and Quack Grass.

Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved By Dr. Williams' Pink Pills.

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Berger, Wingham, Ont. "I got so bad I had to stop working and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I got the bottle at a drug store, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Stiffness, etc." "I got so bad the blood very bad," Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all run-down or nervously exhausted people. Try them. At your druggist's. 50c.

Cried Herself to Sleep

All was well, until the sudden attack made life hideous every month. She took a tonic... Lydia E. Pinkham's Vegetable Compound relieves cramps.

Feeding The Family

It is not an easy matter to feed a family properly and economically. This responsibility rests upon the mother. In the selection of foods she should follow certain principles, and if she does the result will be balanced meals for the family at a minimum expense.

A balanced diet is one which contains a sufficiency of all the various substances which the body requires from foods. A balanced diet provides the materials needed for the proper growth and functioning of the body, in other words for healthy development and healthy living.

The regular monthly meeting of St. Mary's W.A. will be held at the home of Mrs. John Rowles, Tuesday, July 19th, at 2:30 p.m.

Miss Pauline Arden, of Jenner, is visiting with friends in town.

A large number of townspeople attended the picnic at Mayfield on Wednesday of last week.

Mrs. S. Balawicz and children, who had been visiting at the home of Mrs. F. Pawlak, left for their home at Coleridge, Alta., on Saturday. Mr. Balawicz has been transferred to Swift Current.

Word was received that Dau. McEachern was successfully operated on Monday and was reported to be progressing favorably.

Poultry Conditioners---cont.

flock. At the present, when the margin between the cost of production and returns from eggs is extremely small, the expenditure of money for products of this nature is hardly justified.—Experimental Farms Note.

Castle Coombe

Public worship will be conducted at:

Local Paper

Each member of the family requires the right amounts of protein, fat, starch or sugar, vitamins and mineral salts. Milk is the one food which comes nearest to supplying all these requirements in the proper amounts. However, milk alone is not a suitable diet after the first few months of life, and so we must look to other foods to supply the food requirements of the family.

The commonest fault in the family diet is that it does not contain a sufficient amount of those foods which are comparatively rich in vitamins and minerals. Meat, white bread and potatoes are good foods and should be included in the diet. Nevertheless, when they make up practically the whole diet, then the diet is unbalanced and not satisfactory.

The family diet should include milk and milk products such as butter and cheese, fresh green vegetables and tomatoes, either raw or cooked, fresh fruits, eggs and liver. These are the foods which provide the vitamins and

minerals which are so often lacking in the family diet. In working out a minimum food budget to maintain health, it is estimated that for a family of five, thirteen quarts of milk a week are required, which means that over one quarter of the money spent on food goes for milk. One fifth of the money should be used to buy vegetables, potatoes, tomatoes, carrots, turnips and onions.

The general tendency is to spend too large a percentage of the money available on meats and sweets. This is not a criticism of meats and sweets, but merely a statement that when there is a limited amount of money available it is necessary to get the most out of every cent and at the same time secure a balanced diet.

In order to do this it is necessary for the mother to plan what she will buy and how she will arrange the meals.

Work is progressing rapidly on the grain galleries which rise 80 feet above the quayside at Churchill port. Last year, these galleries which carry grain to the deep sea ships, had only been constructed to a point where they permitted the use of five grain spouts. This year they are extended right to the end of the wharf on the north, a distance of 1400 feet. There will be a total of 23 spouts. Four ocean steamers will be able to line up in a row. They

can be loaded in a day. Some idea of the speed with which they may be loaded may be gained from the operation of Pool No. 7 elevator at Fort William, which loaded five and

a half million bushels in six hours. The Churchill terminal house is practically a duplicate of the Twin Cities plant, except that the storage space is not as large.
